

Transport Infrastructure Ireland's (TII's) mission statement is to provide high quality transport infrastructure and services, delivering a better quality of life and supporting economic growth.

TII will strive to incorporate sustainability principles into the development and operation of the road and light rail networks; therefore, contributing to social well-being, supporting economic efficiency, and protecting, restoring and enhancing environmental systems for future generations.

Through the following strategic goals, TII is committed to embedding sustainability objectives into our core activities.

Corporate Leadership:

- ➔ Ensure that consideration of sustainability principles are embedded at all levels of the decision-making process
- ➔ Promote the delivery of transport solutions that support land use planning policy to facilitate appropriate urban densities through engagement with our stakeholders and local authority partners
- ➔ Create and maintain transport links to enhance connectivity between rural and urban communities to support the development of the wider economy
- ➔ Maintain functionality, efficiency and safety of the national road and light rail network to accommodate sustainable land use patterns
- ➔ Explore sustainable funding mechanisms to support the delivery of road and light rail projects while preserving our network assets

Strategic Management:

- ➔ Use research, knowledge and experience to provide guidance and standards for industry to ensure common alignment of our sustainability goals and to enhance collaboration in the provision of road and light rail networks

- ➔ Deliver innovation in road and light rail network design, construction and maintenance, including the reduction and reuse of natural resources, protection of ecological habitats and green procurement
- ➔ Increase the use of information technology and new thinking to support innovation, optimise collaboration and refine processes; aiding and enhancing the user experience when interfacing with TII
- ➔ Achieve efficiency gains in the operational running of our network systems, particularly in the use of natural resources and energy efficiency
- ➔ Continue to adapt Ireland's national road and light rail networks to enhance resilience to climate change

Stakeholder & Public Engagement:

- ➔ Demonstrate leadership and commitment to sustainability through guidance to staff and supply chain partners
- ➔ Undertake dialogue with stakeholders and the wider community through the planning process

Evaluation & Continual Improvement:

- ➔ Periodically evaluate the effectiveness of our sustainability approach in the delivery of our core activities

Supporting these commitments, TII undertakes to prepare and deliver a sustainability plan, in order to integrate sustainability principles into our culture, our processes and our projects.
