

Note

The following summary Table, produced daily, provides traffic trend information derived from a small sample set of traffic counters located on the national road network.

The information below covers the morning period from 7am until 10am. The trend for car traffic from this period of the day generally correlates closely with the overall daily trend in car traffic at each location.

Introductory Remarks

- Traffic figures are measured from 7am to 10am so as to provide an early indicator each day.
- Weekly heavy goods vehicle traffic has remained largely stable and accordingly the daily figures provided are for cars only.
- The changes recorded day-to-day are not cumulative – they compare only the current day's figures versus the same day in the previous week and the same day last year.
- **Level 3 restriction came into effect on Wednesday 7th October 2020.**

Daily Data for Monday 1st November

- The comparison with the 'same day last week', Monday 25th October, has been omitted as it was a Bank Holiday and the associated traffic volumes do not provide a meaningful comparison.
- Overall, this morning's traffic volumes show a substantial increase as compared to Traffic volumes as compared to the same day in 2020.
- Car traffic just south of the Northern Ireland Border on the N1 at Jonesboro shows a +69% change as compared to the same day in 2020.
- In the case of the non-motorway border counter sites, the changes in car traffic volumes since the same day in 2020 ranges from -28% on the N16 west of Manorbhamilton to +39% on the N3 north of Belturbet. It should be noted that traffic volumes at the N2, N3, N14, N15 and N16 counters are lower than at the motorway traffic counters and are likely to display wider fluctuations in traffic figures than other traffic counters.
- Traffic volumes on the radial routes into Dublin, comparisons with the same day in 2020 are as follows: +27% on the M1 at M50 to Airport, +27% on the M11 at Bray, +30% on the M4 at Celbridge-Maynooth, and +21% on the N7 at Citywest.
- The M50 (N3 Navan Road to N4 Galway Road) shows a +24% increase as compared with the same day in 2020.
- In the case of the regional cities the changes in car traffic volumes this morning as compared with the same day 2020 are as follows: N83 Galway +12%, N40 Cork +18%, M9 Waterford +36% and M7 Limerick +32%. N6 Bothar na dTreabh, is out of operation for a number of weeks due to roadworks. For the purposes of maintaining detail on Galway traffic trends a counter on N83 at Claregalway is being used.
